Career Vision

My eagerness toward gaining knowledge about advancements and innovations in emerging technologies inspired me to choose computer sciences as a field of study and career. B.E degree provided me foundational knowledge and part-time work and small-scale projects in the field provided me hands on experience to design webapps, desktop applications and CMS like WordPress. Positive attitudes, pro-active approach toward personal development, analytical and problem-solving skills are my assets, which enabled me to achieve academically, and are my key resources to grow professionally.
